

# Daniel Colmenares

## Web Developer

### About me

Web developer, tech enthusiast, amateur writer and passionate about video games. I love to learn something new every day, creating solutions using technology and code. I used to be a bike messenger in Mail On Bike, then I created a Administrative System for them so it can improve their operations and efficiency. My dreams are to develop an RPG video game, write a Sci-fi novel and teach others about technology and programming. Lover of coffee, science and music.

### Professional Experience

#### Velozient / Verify

Web Developer  
Nov 2022 - Sep 2023

#### Goals

- Develop new features for VerifyData's product.
- User Interface Maintenance.
- Develop and support connections between the company's products.
- Brand new User Interface using VueJS.

#### Technologies Stack

VueJS  
jQuery  
CSS  
C# / MVC 4.5 / Razor

#### Details

Using my knowledge as a frontend developer, my main task was to update the client's User Interface using modern JavaScript, VueJS and CSS methods. Additionally, I was instructed to support the backend and the different connections between the client's products using C#.

#### Codealo

Web Developer  
Aug 2021 - Aug 2022

#### Goals

- Develop the new versions of Codealo web and it features.
- Manage the changes, content and features in Strapi.
- Support in content creation.
- Events and Streams to create Codealo community.

#### Technologies Stack

NextJS  
TypeScript  
TailwindCSS  
Strapi v3

#### Details

As member of the Developer Team, I was responsible to update and create new features for Codealo web site and it's backend made with Strapi. Also I participated in events and streams to create a community and teach them how they can start in programming.

# Languages

-  Spanish (Native)
-  English (Conversational)
-  German (Basic)

## Freelance

Web Developer  
Aug 2021 - Currently

### Technologies Stack

ReactJS / NextJS  
TypeScript  
TailwindCSS  
VueJS

## Goals

- Develop two PWA for a Venezuelan supermarket distributor.
- Created a page to show historical collections for a Venezuelan foundation.
- Support in the development of Cryptolab, now called Hashi.
- Simple E-Commerce page to sell breads and desserts.

## Details

Creating side projects with friends and my uncle as freelance. Made several frontend projects to sharp my skills.

---

## Mail On Bike

Web Developer FullStack  
Jan 2021 - Currently

### Technologies Stack

VueJS v2  
TailwindCSS  
Express  
Sequelize & MySQL

## Goals

- Develop a high-custom frontend adapted to the needs of the company.
- Migrated almost 7 years of data from Excel to MySQL.
- Created a backend system to retrieve data from DB an connect others apps.
- Project manager of two additional apps: for clients and for bikers.

## Details

My first job as web developer. I made an Administrative System for the Courier-Delivery in bikes service in Lima.
